

Educational Activities for WAR IN MY LIFE

These educational activities may be used as a unit or as discrete lessons.

1. **If you use War in My Life as a unit**, you may find it useful to spend time with the class to view the photos and to show your students the educational activities from which they can choose. (Note: Preview the photos; some have graphic content.) If your students are able to access this unit online they could review the photos and activities and then come to class prepared to sign up for an activity.
2. **If you use one or a few photos as the basis for a lesson**, you might
 - Choose one assignment for all students
 - Allow students to choose an activity themselves, or
 - Assign activities based on the learning and ability needs of your students.
3. Take a look at the **Index of Activities (2.3.1)** which links each photo to activities which are divided into these categories:
 - Further reading/research
 - Writing
 - Oral presentations
 - Media
